

Benefits of a Quality Control Review

Quality Control (QC) provides reviews from fully trained and seasoned underwriting professionals.

Quality Control Reviews:

- **Enhance Your MI Coverage.** After a successful review, insurable loans automatically receive Day One rescission protection for guidelines and eligibility, and protection at 12 months for the appraisal (versus protection starting after 36 timely payments without the QC review).
- **Are Completely Free.** Extra help at no additional charge.
- **Give Us a Chance to Collaborate.** You'll receive communications from us at every step, with the opportunity to respond to preliminary findings, so it's an effective joint effort.
- **Offer Training Opportunities.** QC findings can help you pinpoint areas for staff training and development.

Arch MI's QC team is committed to your success.
